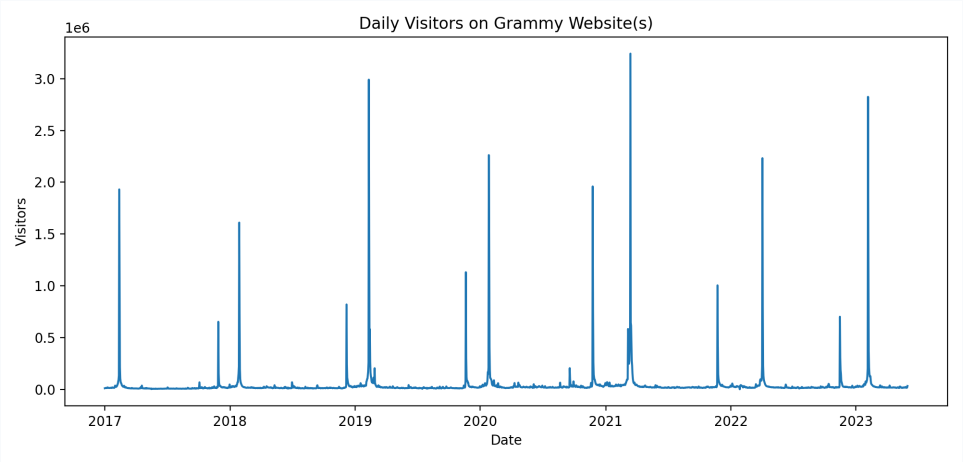
Grammy Website Analytics Project

A simple first-time analysis focused on traffic, engagement, demographics, and device usage.

Prepared for portfolio use

Regular Day Avg.	Awards Night Avg.	2023 Device Mix
32.4K	**1.39M**	**68% Mobile**



Allen George

Project Goal and Data Used

Only the provided files were used for this analysis

Goal

Decide whether the Grammy and Recording Academy websites should stay separate by comparing traffic patterns and engagement KPIs.

Files used

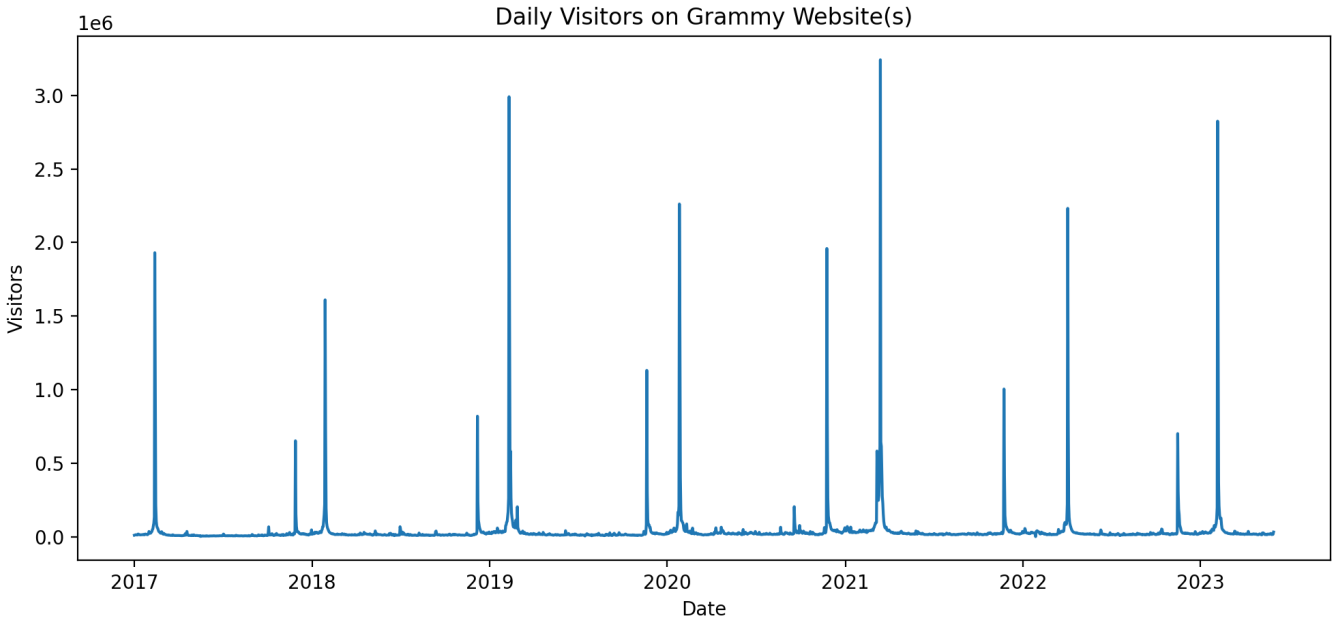
- grammy_live_web_analytics.csv
- ra_live_web_analytics.csv
- grammys_age_demographics.csv and tra_age_demographics.csv
- desktop_users.csv and mobile_users.csv

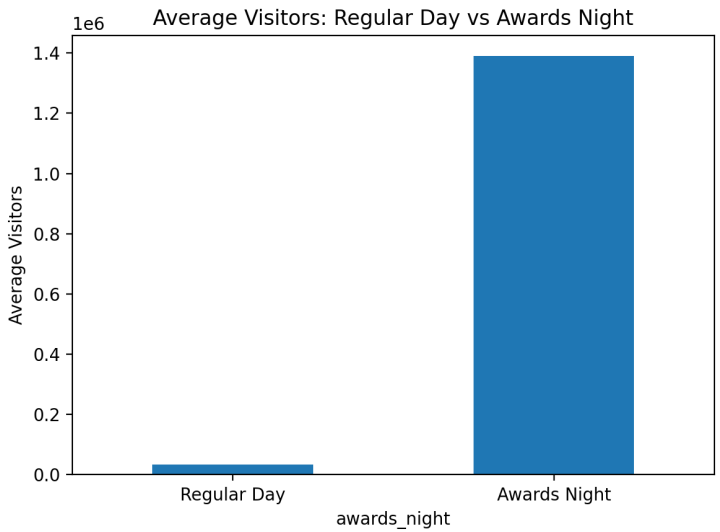
Simple workflow

- Load data in pandas and convert dates
- Split the original Grammy traffic data at 2022-02-01
- Calculate pages per session, bounce rate, and average session duration
- Compare audience age mix and device share
- Turn the results into a clear business recommendation

Traffic is Highly Event-Driven

Awards night creates the largest spikes by far





Regular Day	Awards Night
32.4K	**1.39M**

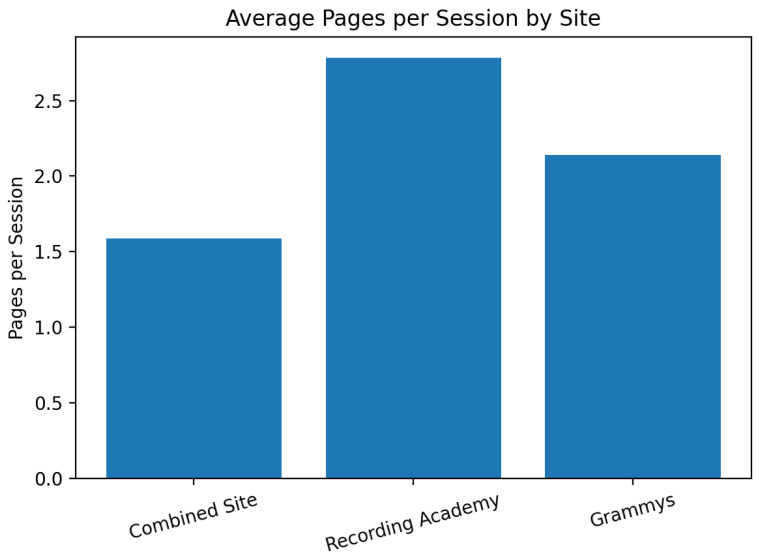
Main takeaway

Traffic jumps by about 1.36 million visitors on awards night versus a normal day. The Grammy website behaves like a strong event brand, with attention concentrated around the show.

Engagement KPI Comparison

Separate websites perform better than the old combined site

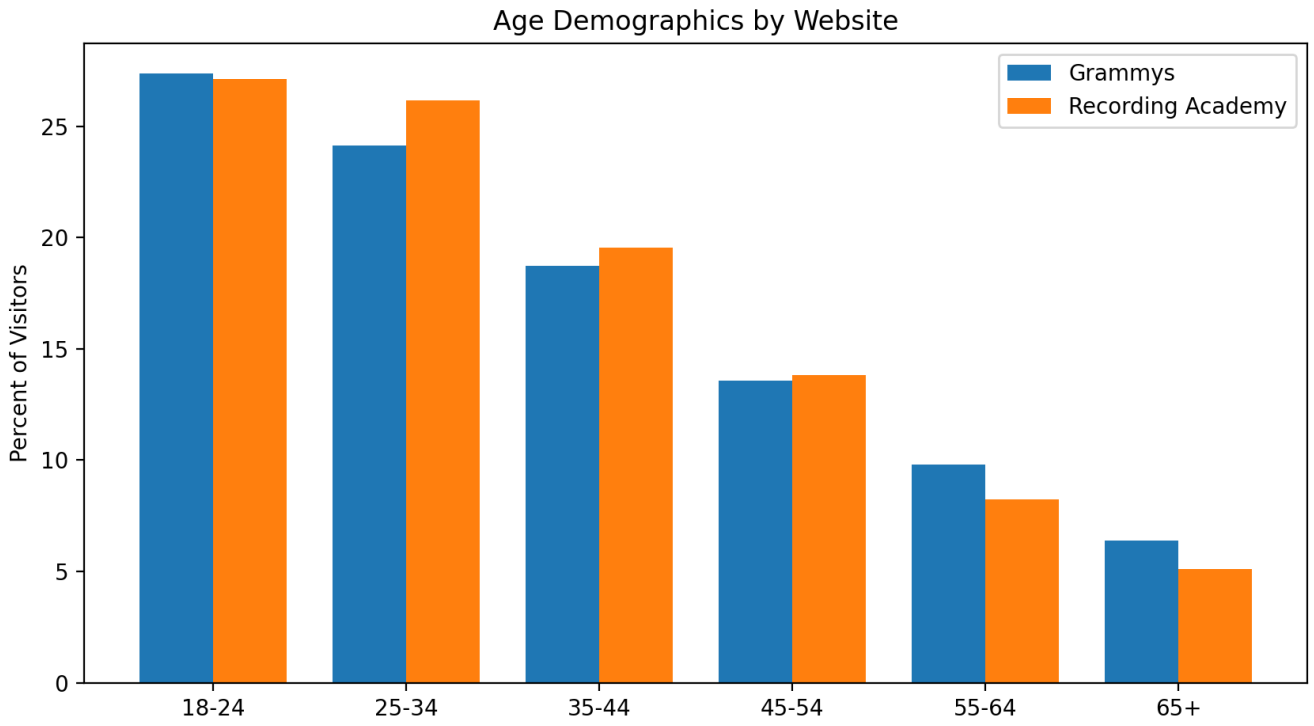
Site	Pages / Session	Bounce Rate	Avg Session Duration
Combined Site	1.59	41.58%	102.85 sec
Recording Academy	2.78	33.67%	128.50 sec
Grammys	2.14	40.16%	82.99 sec

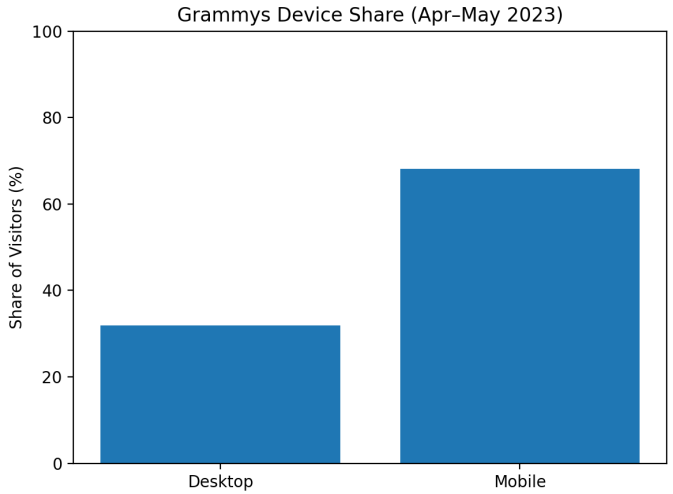


- The combined site had the weakest session depth.
- Recording Academy had the strongest overall engagement mix.
- Grammys still benefits from brand interest, but users spend less time there.

Audience Profile

Younger users dominate, and mobile is the main access point





Desktop Share
31.84%

Mobile Share
68.16%

Both sites are strongest with visitors under 35. This supports a fast, visual, and mobile-first Grammy experience.

Benchmark vs. AMA

AMA benchmark was included in the project notebook

Metric	AMA	Grammys
Avg Visit Duration	5 min 53 sec	1 min 23 sec
Pages / Visit	2.74	2.14
Bounce Rate	54.31%	40.16%

- Grammys beats AMA on bounce rate.
- AMA is stronger on visit duration and pages per visit.
- The biggest opportunity for Grammys is keeping users engaged longer after they land on the site.

Total Visitors (Apr–May 2023)

1,428,482

Recommendation

Keep the websites separate

- The split created a more focused user experience for two different audiences.
- Recording Academy performs best as the informational and organization-focused site.
- Grammys works best as an event-driven and entertainment-focused brand destination.
- The next priority should be improving time on site and session depth, especially on mobile.

Best KPI Mix	Largest Traffic Driver	Main UX Priority	Final Decision
Recording Academy	**Awards Night**	**Mobile Engagement**	**Stay Separate**
